Consistent capture guide

Camera Film vertically in 4K or 1080p at 30 fps. Lock the phone on a tripod and clean the lens.	Light Use bright, soft light from the front or side. Start on a clear, well-exposed frame - never black.
Clips Record preparation for 6-10 seconds, active cooking for 10-15 seconds and slow transformations for 20-30 seconds.	Framing Keep hands, utensils and food inside the central safe area. Leave the lower quarter clear for captions.
Continuity Keep the same pan, surface and lighting through a recipe. Capture a clean before and after shot.	Audio Natural cooking sound is useful. Avoid radio, television and copyrighted music in the room.
File names Use the exact filename beside every shot so the studio can match footage quickly.	Safety Never compromise safe knife handling or move hot cookware for the camera. Reframe the camera instead.

Shared batch shots

Film each action during the genuine recipe session. These groups help maintain a consistent camera position without substituting food between recipes.
